Implementing ComEd's Proposed)	
Residential Rate Stabilization Program)	

REPLY TESTIMONY OF JONATHAN WALLACH ON BEHALF OF THE CITIZENS UTILITY BOARD, THE COOK COUNTY STATE'S ATTORNEY'S OFFICE, AND THE CITY OF CHICAGO

CUB-CCSAO-CITY Ex. 2.0

AUGUST 21, 2006

1		
1	Q:	Please state your name, occupation, and business address.
2	A:	I am Jonathan F. Wallach. I am Vice President of Resource Insight, Inc., 5
3		Water Street, Arlington, Massachusetts.
4	Q:	Are you the same Jonathan F. Wallach who submitted direct testimony in
5		this docket?
6	A:	Yes.
7	Q:	What is the purpose of your reply testimony?
8	A:	The purpose of this testimony is to respond to the those portions of the
9		rebuttal testimony of Commonwealth Edison Company ("ComEd" or "the
10		Company") witnesses J. Barry Mitchell, Robert K. McDonald, Paul R.
11	I	Crumrine, and Michael J. Meehan that pertain to the findings and
12		recommendations of my direct testimony. In addition, this testimony
13	I	addresses the Company's proposal to offer the Residential Rate Stabilization
14		Program (RRSP) on an opt-in basis, per the recommendation of Staff witness
15		Peter Lazare.
16	Q:	Please summarize the findings and recommendations of your direct
17		testimony.
18	A:	My direct testimony addresses ComEd's proposal to accrue interest on
19		deferred amounts at its authorized rate of return, and discusses why deferrals
20	I	under the RRSP are less risky than other regulated investments and are thus
21		likely to require a lower return than other regulated investments. My direct
22	ı	testimony also suggests that carrying costs should be based on the actual
23		costs to finance deferrals. In this regard, I note in my direct testimony that
24		the finding by Ameren, in it ² s initial filing in Docket No. 06-0448,, where
25		Ameren stated found that short-term debt would be a likely source of funds

26		for financing the deferral asset. Moreover, , along with Ameren's and Ameren
27		recommendedation that the Commission investigate the feasibility of
28		reducing interest costs through securitized financing of deferrals.
29		In addition, my direct testimony discusses the fact that the Company's
30		filing lacks specific detail on the treatment of new customer accounts and other
31		essential information for evaluating the reasonableness of its proposal.
32		In light of these findings, I recommend in my direct testimony that the
33		Commission not approve the Company's proposal. Instead, I recommend
34		that the Commission undertake an investigation of the feasibility of
35		securitized financing of power-cost deferrals. <u>Neither the Company's</u>
36		rebuttal testimony or the testimony of the Staff has persuaded me to change
37		any of my recommendations.
20	Q:	Are there elements of the proposed RRSP that reduce cost-recovery risk?
38	٧·	The mere elements of the proposed KKS1 that reduce cost recovery fish.
38 39	A:	As I noted in my direct testimony, there are a number of elements of the

CUB-CCSAO-<u>City??City</u>Ex.<u>2.0</u> Direct Testimony of Jonathan Wallach

50 Q: What is ComEd's position with regard to the risk and appropriate return 51 on RRSP deferrals?

A: While acknowledging that aspects of the RRSP reduce recovery risk relative to
other ratebase assets, Mr. McDonald asserts that this reduced risk has no bearing
on required return on deferrals. Instead, Mr. McDonald claims that: "Absent an
absolute guarantee of recovery, actual carrying costs will not be lower than
ComEd's weighted average cost of capital."²

57 **Q:** Does this position appear reasonable?

A: No. _Mr. McDonald's argument appears counter-intuitive in its assertion that
any reduction in recovery risk short of an "absolute guarantee" of full recovery
will not reduce carrying costs. _The implication of Mr. McDonald's assertion
would appear to be that the deferral asset would have to be equivalent to a riskfree investment in order to reduce carrying costs below the Company's cost of
capital.

Mr. McDonald's argument in this regard also appears inconsistent with his claims regarding the benefits of securitization. Specifically, Mr. McDonald believes that securitized financing would lower carrying costs on the deferral balance, even though securitization does not offer the "absolute guarantee" of recovery that Mr. McDonald posits as required to reduce carrying costs.

69 Q: Does the Company dispute your suggestion that carrying costs should be 70 based on the actual costs to finance deferrals?

² Rebuttal Testimony of Robert K. McDonald, ComEd Ex. 5.0, ICC Docket No. 06-0411, August 1, 2006, p. 8.

CUB-CCSAO-<u>City??City</u>Ex.<u>2.0</u> Direct Testimony of Jonathan Wallach

ICC Docket No. 06-0411

71	A:	No. ³ _However, Mr. McDonald does take issue with the findings by both
72		Ameren and Staff witness Michael McNally that short-term debt is a likely
73		source of funds for financing the deferral asset.
74	Q:	What rates of return will Maryland utilities apply to the regulatory assets
75		established for deferral of residential power-supply costs?
76	A:	Both Baltimore Gas and Electric and the PHI Companies (Potomac Electric
77	1	Power and Delmarva Power and Light) intend to accrue interest on power-cost
78		deferrals at their actual short-term borrowing rates. ⁴
79	Q:	What is the Company's response to your recommendation for an

80 81 82 83 84		investigation of securitized financing? The Company appears to be of two minds with regard to my recommendation. Mr. McDonald states that, under the right conditions, ComEd would be interested in securitized financing of the deferral balance. Mr. Mitchell, on the other hand, states that "an investigation of the type suggested by Mr. Wallach is

³ In fact, in its application for rehearing in Docket No. 05-0597, the Company proposes to derive the interest cost on its pension contribution at the actual cost of debt that would have been used to fund the contribution. See *Verified Application for Rehearing of Commonwealth Edison Company*, ICC Docket No. 05-0597, August 15, 2006, p.22.

⁴ BGE will accrue interest at short-term rates until and unless it issues securitized debt.

⁵ *Rebuttal Testimony of J. Barry Mitchell*, ComEd Ex. 4.0, ICC Docket No. 06-0411, August 1, 2006, p. 9.

CUB-CCSAO-<u>City??City</u>Ex.<u>2.0</u> Direct Testimony of Jonathan Wallach

ICC Docket No. 06-0411

Mr. Mitchell misreads my direct testimony as proposing that the investigation be 88 A: conducted in a proceeding separate from the instant docket. As such, he is 89 concerned that such an investigation would delay implementation of the RRSP. 90 In fact, I suggested that the investigation could be part of the instant docket 91 92 or carried out in a separate docket. If the Company is concerned about the timeliness of a separate docket, then I see no reason why the investigation could 93 not be pursued as part of this proceeding. However, such an investigation 94 would require an additional phase to collect testimony on the issues surrounding 95 securitized financing. 96 97 **O**: Did the Company respond to the concerns raised in your direct testimony

regarding treatment of new customer accounts?

A: Yes. _As part of its proposal to implement the RRSP on an opt-in basis, the
Company proposes to limit eligibility to accounts existing as of December 31,
2006. This proposal to limit eligibility reasonably addresses my concerns
regarding new accounts. _I address the Company's opt-in proposal below.

Q: How did the Company respond to your finding that the filing lacked the
information needed to evaluate the reasonableness of the proposed RRSP?

- A: The Company provided a number of *pro forma* financial analyses in response to discovery, and suggests in its rebuttal filing that additional information regarding the likely magnitude of rate increases and deferrals will be entered into the record once auction results are known and distribution rates are finally approved in Docket No. 05-0597.
- 110 The Company's proposal to supplement the record is reasonable, so long 111 as other parties <u>have retain</u> the right to provide evidence in response to the 112 Company's supplemental filings.

113 **Q:** Please describe the Company's opt-in proposal.

CUB-CCSAO-<u>City??City</u>Ex.<u>2.0</u> Direct Testimony of Jonathan Wallach

5

ICC Docket No. 06-0411

114	A:	Based on the recommendation by Staff witness Lazare, the Company proposes
115		to implement the RRSP on an opt-in basis. According to Mr. Crumrine, the opt-
116		in version of the RRSP would have the following features:
117		• The enrollment period will extend from January to March of 2007.
118		• Starting with the April, 2007 billing period, participant bills will be credited
119	I	with an amount that ensures that total rates increase by no more than 10%,
120		as proposed by Mr. Lazare.
121	I	• In addition, participants will receive a one-time credit to cover deferrals for
122		the January through March billing periods.
123		• Deferral balances will be tracked by customer account. <u>Any customer that</u>
124	I	terminates service will be rendered a final bill for recovery of the
125		outstanding deferral balance.
126		• Program eligibility will be limited to existing accounts as of December 31,
	I	
127		2006.

Second, participation, and thus deferred amounts, are likely to be substantially less than under the mandatory version of the RRSPAs a result, the opt-in approach (in conjunction with the 10% rate increase proposed by Mr.

Q: How should the Company proceed with the development of the opt-in
proposal?

A: The Company should develop detailed specifications for the design and
implementation of the opt-in mechanism, including detailed budgets for
implementation and operations. _According to Mr. Meehan, the Company's
current estimates of program costs are "high level estimates."⁶ _As part of the
detailed design process, the Company should develop more precise budgets for
fixed and variable program expenditures.⁷

As part of this development effort, the Company should undertake additional financial analyses that incorporate estimates of likely program participation rates and that evaluate financial metrics under a range of scenarios for financing deferral balances. _Once available, these analyses should also incorporate the results of the auctions and final resolution of Docket No. 05-0597.

153 O: Please summarize your conclusions. Does incorporation of an opt-in 154 provision eliminate your concerns with the RRSP?

155	A: I support tNo. The incorporation of an opt-in provision, because it provides
156	customers with a choice regarding their participation in the plan. However, the
157	opt-in provision, but it does not eliminate my concerns regarding the carrying
158	charges that apply to deferred balances The Commission should not approve
159	any RRSP plan that includes carrying charges above the actual cost of the funds

⁶ *Rebuttal Testimony of Michael J. Meehan*, ComEd Ex. 8.0, ICC Docket No. 06-0411, August 1, 2006, p. 9. Mr. Meehan also provides an estimate of the impact of the program on uncollectible expenses. Presumably, this is also a "high level" estimate.

⁷ However, as suggested in Mr. Mitchell's rebuttal testimony (p. 3), recovery and allocation of program costs and incremental uncollectible costs is subject to approval by the Commission in future rate cases.

CUB-CCSAO-<u>City??City</u>Ex.<u>2.0</u> Direct Testimony of Jonathan Wallach

ICC Docket No. 06-0411

- used to finance deferral amounts. The Commission should also investigate the
 benefits of securitized financing as a way to reduce the carrying charges
 associated with deferred balances, as Ameren has recommended in its initial
 filing in Docket No. 06-0448. The Commission should not approve any plan
 without fully investigating the options for minimizing the cost of financing
 power-cost deferrals.
- 166 **Q: Does this conclude your reply testimony?**
- 167 A: Yes.
